

DATABASE HANDLING

`show dbs`

`use databaseName`

`show collections`

`db.createCollection("collectionName")`

`db.collection.drop()`

`db.dropDatabase()`

CURD OPERATIONS

---- INSERT

`db.collection.insertOne({...})`

`db.collection.insertMany([ {...}, {...} ])`

---- READ

`db.collection.find()`

```
db.collection.find({})
```

```
db.collection.findOne({})
```

```
db.collection.find({ field: value })
```

```
db.collection.find({ field: { $gt: value } })
```

```
db.collection.find({ field: { $lt: value } })
```

```
db.collection.find({ field: { $gte: value, $lte: value } })
```

```
db.collection.find({ $or: [ { field1: value1 }, { field2: value2 } ] })
```

```
db.collection.find({ $and: [ { field1: value1 }, { field2: value2 } ] })
```

```
db.collection.find().sort({ field: 1 })
```

```
db.collection.find().limit(number)
```

```
db.collection.countDocuments()
```

---- UPDATE

```
db.collection.updateOne({ filter }, { $set: { field: value } })
```

```
db.collection.updateMany({ filter }, { $set: { field: value } })
```

```
db.collection.updateMany({}, { $set: { field: value } })
```

```
db.collection.updateOne({ filter }, { $unset: { field: "" } })
```

```
db.collection.updateOne({ filter }, { $rename: { oldField: "newField" } })
```

```
db.collection.updateOne({ filter }, { $inc: { numericField: value } })
```

```
db.collection.updateOne({ filter }, { $mul: { numericField: value } })
```

```
db.collection.updateOne({ filter }, { $min: { field: value } })
```

```
db.collection.updateOne({ filter }, { $max: { field: value } })
```

----DELETE

```
db.collection.deleteOne({ filter })
```

```
db.collection.deleteMany({ filter })
```

```
db.collection.deleteMany({})
```

---- ARRAY OPERATORS

```
db.collection.updateOne({ filter }, { $push: {  
arrayField: value } })
```

```
db.collection.updateOne({ filter }, { $push: {  
arrayField: { $each: [value1, value2] } } })
```

```
db.collection.updateOne({ filter }, { $pop: {  
arrayField: 1 } }) // remove last element
```

```
db.collection.updateOne({ filter }, { $pop: {  
arrayField: -1 } }) // remove first element
```

```
db.collection.updateOne({ filter }, { $pull: {  
arrayField: value } })
```

```
db.collection.updateOne({ filter }, { $addToSet: {  
arrayField: value } })
```

```
db.collection.updateOne({ filter }, { $set: {  
"arrayField.index": value } })
```
